

ZHANG Jiayu, Irene

Project & Product Manager

Location: Taoyuan City, Taiwan | Email: zhangjiayu71@hotmail.com

Portfolio: <https://susancat.github.io/> | LinkedIn: [linkedin.com/in/irene-zhang-970701/](https://www.linkedin.com/in/irene-zhang-970701/)

Github: <https://github.com/susancat>

Languages: English (Fluent), Mandarin (Native), Cantonese (Fluent)

Professional Summary

Technical Project Manager with over 5 years of experience delivering end-to-end digital products and software solutions across distributed teams. Highly proficient in API integrations, Agile execution, and managing complex software lifecycles from concept to launch. Skilled in bridging business objectives with technical execution, utilizing an IT Master's background and AWS AI certifications to drive data-informed decisions. A proactive problem-solver experienced in stakeholder alignment, risk mitigation, and ensuring high-quality delivery in fast-paced environments.

Core Competencies

- Technical Product Management: End-to-end SDLC ownership, Agile/Scrum leadership, and roadmapping for SaaS and integrated systems.
- API & Integration Expertise: RESTful API design, Auth validation (OAuth2/JWT), and technical debugging via Postman (CRUD & Response analysis).
- Data Science & Architecture: Hands-on with AI Agents, RAG pipelines, and SQL/NoSQL (MongoDB/PostgreSQL); leverages BigQuery/GA4 and Firebase for system-level debugging and metric-driven iteration.
- Global Team Leadership: Manages bilingual, distributed teams (up to 10 members) across 5+ time zones; expert in stakeholder alignment and risk mitigation.
- Cloud & DevOps: Practical experience with AWS Serverless, CI/CD pipelines.

Project Engineer/Frontend Web Developer | Outblaze Limited Hong Kong

Contract/Full-time | Aug 2020 – Mar 2026 (Total: 4.5+ Years, across two tenures)

Period II: Project Engineer | Jul 2025 – Mar 2026 (8 Months)

- Continued supporting Outblaze as a product management role, leading the previous web3+AR project.
- Secured a development grant (750,000 AUKI token/15,000 USD) from the [AukiLabs](#)
- Defined product scope and authored PRD, establishing clear requirements and success metrics; Drafted initial legal agreements for vendors.

- Led product management for the [second phase of MOM iOS app](#) development, including game/UI flow design, backlog management, and cross-team coordination (UI/Unity development).
- Managed sprint testing and QA alignment; oversaw TestFlight/App Store releases, ensured App Store compliance requirements for successful app submission.
- Supported go-to-market efforts (NGO partnerships, content channels) and monitored product analytics via GA4/Firebase.

Period I: Aug 2020 – Apr 2024 (3 Years 8 Month)

Project Engineer | Dec 2022 – Apr 2024 (Remote)

- Managed [Web3 AR iOS app \(Mindful Ocean Metaverse\)](#), coordinated cross-functional delivery of Web3 AR architecture across 5 time zones, ensuring platform stability and App Store compliance.
- Oversaw API & blockchain integration (wallets, NFTs, token systems): Orchestrated the integration of blockchain microservices by drafting comprehensive API documentation. Validated CRUD operations and authentication flows via Postman, reducing integration errors by analyzing server responses and collaborating with backend engineers to debug complex error states.
- Built product documentation & compliance workflows for App Store.
- Analyzed game data (BigQuery, Dune) to improve GameFi product balance.
- [Crazy Defense Heroes](#) – conducted on-chain/off-chain data analytics, built dashboards, and developed Discord bot for GameFi engagement.
- Worked in a Scrum-based delivery model with 2-week sprints, collaborating with external engineers on sprint planning, feature scoping, QA validation, and bi-weekly sprint reviews with stakeholders to iteratively deliver product milestones.

Frontend Web Developer | Aug 2020 – Nov 2022 (On-site)

- Full-stack web development: developed educational gaming prototypes [integrating Roblox and web app](#) (Virtual School Maker) by React.js, Node.js and MongoDB/SQL.
- API Development & Debugging: built and tested RESTful APIs using Postman, integrating data sources and troubleshooting requests.
- Web3 Development: developed high-fidelity prototype of [blockchain DApps](#), deployed smart contract on Polygon chain for Mindful Ocean Metaverse.
- Mentored interns.

Project Specialist | KingOne Interactive Ltd.

Taipei, Taiwan | Apr 2024 – Jul 2025 (On-site)

- Delivered **10+** enterprise technical integration programs involving AR/AI systems, hardware-software deployments, and vendor coordination under fixed deadline constraints.
- Managed cross-functional teams (up to 10 members) to deliver AR/VR, AI, and interactive installations.

- Coordinated HW/SW integration projects (AI systems, kiosks, interactive devices) with internal engineers and external vendors.
- Managed delivery risks, testing schedules, and on-site rollout under fixed deadlines.
- Specification and scope of development, product backlog management, development and delivery, stakeholder management

Projects:

- [3M Staff Training Center](#) Deployed RFID + simulation devices, training 1,700+ employees.
- [Everrich](#): Taiwan Intl Travel Expo – Built interactive lottery system with 3D animation engaging 8K+ attendees.
- [Shopee Brand Summit](#): Delivered projection mapping systems across SEA markets.
- Garmania: [AI Photo Booth](#) & [AI DJ Systems](#) – Integrated client AI APIs into custom hardware/software.
- [Tairoa website AI integration](#): Coordinated with UpGPT and Google Translate API to add AI search, chatbot, and multilingual features.
- Additional projects: [AR app \(Congatec\)](#), museum [kiosk systems](#), [LINE OA integration](#), several 3D animation projects.
- Product Management: [L'AiR AI SaaS Platform](#): AI+RAG implementation for AI assistant.

Independent Side Projects (2025 – 2026)

- [AI RAG Assistant](#): Built retrieval-augmented generation pipeline (AWS Lambda + FAISS).
- [CI/CD Practice](#): Implemented automated pipeline for testing & deployment on AWS.
- [Terraform on AWS](#): – Built minimal Infrastructure-as-Code use case for Lambda deployment.
- [AI TTS Story-telling](#): AI-powered text-to-speech powered by OpenAI voice model and API.
- [AI agent-104 job hunter](#): an n8n-powered autonomous agent using LLM reasoning to filter job listings and automate Slack notifications.

Certifications

- AWS Certified AI Practitioner (AIF-C01) – Amazon Web Services, Feb 2026
- Professional Scrum Product Owner I (PSPO-I) – Scrum.org

Education & Certifications

- M.Sc., Information Technology | University of Glasgow, UK
- PhD, Gender Studies/Political Science | Chinese University of Hong Kong
- M.Phil., Gender Studies/Political Science | Chinese University of Hong Kong
- LLB, Law | Shandong University
